Counting money

Ji-Hoon wanted to earn more money for a helmet to match his scooter. He decided a lemonade stand was the best option. Can you help Ji-Hoon figure out how much money he needs for his lemonade stand?

Note: some of the questions are more difficult than others. Do only the ones that feel right for your family.

Ji-Hoon's mom spent $4 at the grocery store on lemons for Ji-Hoon's lemonade stand. Ji-Hoon's mom paid for the lemons at the grocery store with a $10 bill. How much change did the cashier give back to Ji-Hoon's mom?

$10
− $4
= $

Ji Hoon's aunt paid for sugar at the grocery store. The sugar cost $2. In her wallet she had 1 toonie ($2), 2 loonies ($1), 8 quarters (25¢), and 10 dimes (10¢). Circle the coins she could use to pay for the sugar. Can you find more than one way to pay?

Toonie

Loonie

Quarter

Dime

At the thrift store, Ji-Hoon handed the cashier $25 dollars. The price of the scooter was $22.39. How much change does the cashier owe Ji-Hoon?

$25.00
− $22.39
= $
